Dear Hiring Manager,

I am excited to apply for the open Engineering position at Underdog. I'm drawn to the opportunity to contribute to a dynamic team that shares my passion for building innovative games.

At Fullstack Academy, I gained expertise in React.js, which I used to display my final project - a JavaScript side-scroller game for the web using canvas. I led my teams' high engineering standards by example, focusing on communication, collaboration and continuous integration.

While working at Internet Brands with Model Mayhem, I implemented scalable web application solutions, frequently problem-solving independently to ensure seamless functionality. My experience at Breatime Studios and Zynga Games honed my ability to adapt and innovate in fast-paced environments.

I am excited about the possibility of bringing my technical expertise and collaborative spirit to Underdog. Thank you for considering my application. I look forward to the opportunity to discuss how my skills align with your team's needs.

Best,

A handwritten signature in black ink, appearing to read 'Hannah Johnson', with a large, stylized initial 'H' and a long, sweeping underline.
