Kalamazoo, MI || (360) 951-0354 || find.serendipity@gmail.com || [linkedin.com/in/findserendipity](https://www.linkedin.com/in/findserendipity)

Dynamic, logically-driven Technical Success Manager with 7+ years of experience bridging the gap between non-technical stakeholders and complex software environments. Combines robust full-stack engineering logic with a deep background in customer adoption, documentation writing, and technical support triage. Skilled at scaling enablement programs, optimizing customer onboarding paths, and interpreting software feedback to drive retention.

Core Competencies

- **Technical Customer Success & Support:** Developer relations, stakeholder management, user onboarding workflows, churn risk reduction, data telemetry interpretation, technical escalation pathing.
- **Enablement & Technical Documentation:** Authoring complex knowledge base guides, procedural checklists, FAQs, user tutorials, and functional UX wireframes for engineering sprints.
- **Software Logic & Infrastructure:** JavaScript, SQL, GitHub Actions, custom Google Apps Script automation, bug tracking tools, Agile/Kanban software development lifecycles.

Professional Experience

Technical Success & Operations Consultant || *Communitrix*, **Remote** Sep 2023 – Present

- Consult for digital product communities to optimize user software adoption, authoring central developer documentation, comprehensive FAQs, and structured technical guides.
- Diagnose and troubleshoot technical user environment configurations, peripheral software integrations, and custom logic issues.
- Leverage generative AI and automated scripts to accelerate administrative output, scale metrics pipelines, and build client-facing reporting assets.

Technical Customer Success Manager || *Community.co*, **Remote** July 2019 – June 2023

- Managed campaign lifecycles and retention health for high-profile client networks, driving platform-wide engagement metrics up from 2% to 7%.
- Programmed custom Google Apps Scripts to automate administrative workflows, streamline complex system reporting, and ingest clean user telemetry.
- Mediated technical product requirements and active software bug logs, serving as the core translation link between external business partners and internal engineering squads.
- Recruited, trained, and managed a distributed team of operations contractors focused on high-quality data collection and technical support accuracy.

Customer Success Specialist & UX Liaison || *Internet Brands*, **Remote** July 2013 – July 2019

- Administered high-volume user systems, boosting overall customer satisfaction from 61% to 96% through targeted product enablement and proactive account health tracking.
- Authored internal and public-facing technical support documentation, product feature tutorials, and initial wireframes to inform active developer sprints.
- Directed multi-tiered user moderation programs, overseeing rapid daily support ticket triage and critical event escalation paths.

Technical Support Triage Coordinator || *Breaktime Studios*, **Remote** Jan 2013 – July 2013

- Managed live-ops support pipelines for mobile software applications, acting as the primary feedback link between a global player base and core engineering teams.
- Aggregated, structured, and prioritized technical user feedback, user application crash logs, and telemetry data to guide upcoming sprint planning cycles.

Technical Projects & Cross-Functional Leadership

Project Manager & Developer || *Fullstack Academy Capstone Project* June 2024

- Led a 4-person technical team through software delivery pipelines, governing project milestones, code reviews, and cross-functional task delegation using GitHub.
- Conducted extensive user feedback collection rounds to isolate customer experience points of friction, refining product logic to increase system usability.

Education & Credentials

Fullstack Academy || Graduate, Full-Stack Web Development Bootcamp **2024**

University of Washington || Bachelor of Arts, Summa cum laude **2011**
