Kalamazoo, MI || (360) 951-0354 || find.serendipity@gmail.com || [linkedin.com/in/findserendipity](https://www.linkedin.com/in/findserendipity)

Hands on Customer Support Operations Leader with 7+ years of experience managing support teams, building automated routing logic, and optimizing ticketing workflows to drastically reduce response times. Exceptional aptitude for rapidly mastering new technical systems, with a proven history of designing standards, help center content, engineering custom automation scripts, and driving team accountability.

Core Competencies

- **Support Operations & Workflow Optimization:** Ticketing queue routing, response time reduction, backlog triage, macro design, help center content strategy, custom reporting dashboards, SLA compliance.
- **Team Leadership & Accountability:** Managing 10+ agent support pods, agent productivity tracking, QA scorecards, onboarding checklist design, SOP creation, training program delivery, escalation handling.
- **Technical Logic & Automation:** Rapid software system adoption, generative AI configuration, API logic, webhook workflows, script based reporting automation (Google Apps Script), data analysis.

Professional Experience

Customer Support Operations Consultant || *Communitrix*, **Remote** Sep 2023 – Present

- Consult for client networks to build centralized help center structures, comprehensive onboarding FAQs, and detailed standard operating procedures.
- Deploy and optimize generative AI tools and custom conversation logic to accelerate ticket resolution times, reduce manual agent backlogs, and streamline support routing.
- Analyze complex system outputs and telemetry data to design intuitive client facing workflows and deliver clean performance dashboards to executive stakeholders.

Customer Success & Support Operations Manager || *Community.co*, **Remote** July 2019 – June 2023

- Headed support workflows and relationship health for high profile corporate networks, driving active platform engagement and ticket metrics from 2% to a robust 7%.
- Programmed custom Google Apps Scripts to automate administrative reporting, optimize data collation, and build automated communication loops.
- Managed queue routing rules, tags, and inbound triage paths to ensure consistent accountability, rapid resolution times, and seamless client escalation handling.
- Partnered directly with internal engineering squads to isolate active software bug logs, optimize data integrations, and accelerate feature delivery times.

Customer Support Specialist & UX Liaison || *Internet Brands*, **Remote** July 2013 – July 2019

- Administered high volume user ticketing queues across chat, email, and phone, scaling overall customer satisfaction (CSAT) metrics from 61% to 96% through systematic process overhauls.
- Authored rigorous internal training checklists and public facing platform documentation from scratch to accelerate agent onboarding and ensure strict SLA compliance.
- Extracted deep technical platform bugs and recurring user friction stories, translating findings into actionable feature briefs for product development and engineering teams.

Technical Projects & Team Leadership

Project Manager & Technical Pod Lead || *Fullstack Academy Capstone* June 2024

- Directed an active software development pod through rigorous project milestones, managing daily stand ups, task delegation, and deployment schedules.
- Structured system testing blocks to capture user feedback, systematically analyzing bottlenecks to optimize system configuration and operational performance.

Education & Credentials

Fullstack Academy || Graduate, Full-Stack Web Development Bootcamp **2024**

University of Washington || Bachelor of Arts, Summa cum laude **2011**
